

LOSS Construction Report

As required by WAC 246-272-08001(7): Before a new Large On-site Sewage System (LOSS) is used and within 60 days following the completion of construction, a licensed engineer must stamp, sign, and submit to the Department a **LOSS Construction Report** (on a form provided by the Department) and “**As-built**” or “**Record**” drawings of the system. The report shall state that the project is constructed and substantially completed in accordance with the approved construction documents; and in the opinion of the engineer, based on information available, the installation and testing of the system was carried out per Department rules. Also before the LOSS is used, the owner shall submit an **Operation and Maintenance Manual** developed by a licensed engineer for the installed LOSS to the Department for approval and obtain a **LOSS Operating Permit** from the Department. **Permit will be issued upon receipt of the Construction Report.**

Please note:

- If a project is being completed in stage construction, attach a map and description of portion of project being certified as being completed as approved on date given below.
- As future portions of staged construction projects are completed, each must be certified as required by WAC 246-272-08001(7).
- Additional Construction Report forms are available upon request from the DOH office below.

Name of Project Served By Sewer System:
